# Change the colours

You can change the colour of the background or text in your story by changing its Stylesheet, which contains CSS code.

You can find it by clicking on the **Story** tab at the top of the outline view then clicking Stylesheet on the right of the menu

Stylesheet

The starter story's stylesheet contains this code:

```css
body, tw-story{
    background-color: White;
    color: Black;
}
```

It tells the browser that the background colour of the page should be white and the text colour should be black.

You can find out what other colours the browser knows the names of at this page https://htmlcolorcodes.com/color-names/ Replace White or Black with any of these colour names.

Color	Name	Hex code	RGB code	HSL code
	Lavender	E6E6FA	230, 230, 250	240, 67, 94
	Thistle	D8BFD8	216, 191, 216	300, 24, 80
	Plum	DDA0DD	221, 160, 221	300, 47, 75

An example of some other colour names.
